

The Pacific Northwest Section, American Water Works Association, Cross Connection Control (CCC) Committee has established a scholarship program in honor of Ray Pettie and Bob Stiles. Ray and Bob dedicated much of their professional lives to cross connection control and helped make the Pacific Northwest a forerunner in the industry.

The CCC Scholarship reimburses tuition:

- In Washington, Oregon, and Idaho; for the Cross Connection Control Specialist Course upon the applicant obtaining the Cross Connection Specialist certification.
- Requests for reimbursement must be made within 12 months of when the application was received by the Committee.

To be eligible for the Scholarship your water system must:

- Be an approved Public Water System as defined by the applicable State Department of Health; and
- Have 300 - 2500 active water service connections; and
- Not have anyone employed by your water system that is currently certified as a Cross Connection Control Specialist; and
- Have a direct permanent employee of the water system assigned to actively administer the Cross Connection Control Program. This employee may not be a contract operator.
- Have not received a scholarship from the PNWS-AWWA Cross Connection Control Committee within the past three years.
- The Committee will consider, on a case by case basis, applications from those systems where the CCS will be ending employment with the water system in the near future.

An active on going CCC program is essential to ensure safe and reliable drinking water for the customers you serve. If your water system meets the above criteria, we encourage you to take advantage of the CCC Scholarship Program by completing the enclosed questionnaire and returning it to me at the address below.
