

February 3, 2017

To: Board of Trustees – PNWS-AWWA
From: Dave Leland, Scholarship Committee Chair
Subject: Report and Update, Winter Trustees Meeting

The Committee is currently receiving applications for this year's scholarships, due February 24. As always, we distributed scholarship information and applications to educational institutions throughout the northwest which support water-related training. This year, thanks to our Executive Director, the scholarship application is submitted by students on-line, via the Section website! In addition, students are requested to have their colleges submit official transcripts electronically, effectively eliminating paper from the scholarship submission and review process.

The committee will review applications on-line via a shared workspace in March, present award recommendations to the Section Chair in early April, and recognize awardees at the Annual Conference in Kennewick.

We look forward to continuing this important support for drinking water workforce and career development, and appreciate the Board's leadership. We appreciate the ongoing support from Ameron, participating subsections, and all those member contributions to the E&T fund!
