

water for people

everyone | forever

May 2013

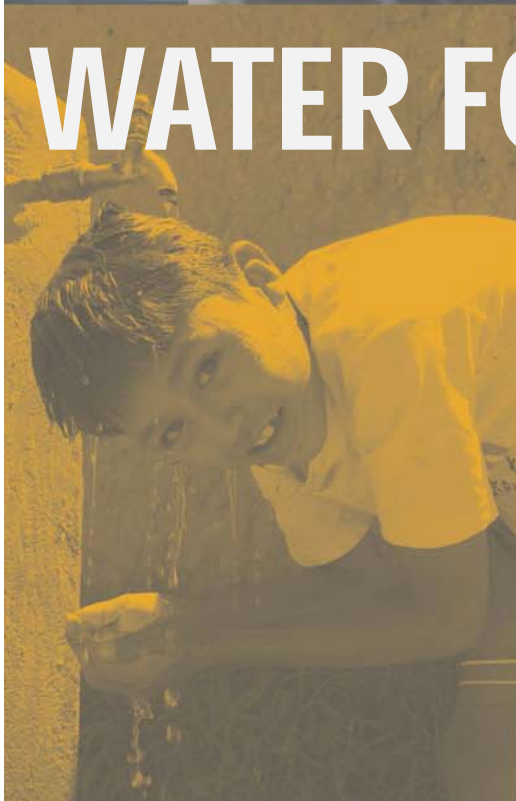

A woman is seen from behind, walking away on a dirt path in a dry, arid landscape. She is carrying a large, light-colored water jug balanced on her head. She is wearing a light-colored tank top and a patterned skirt. The background is filled with sparse, dry vegetation and a hazy, orange-tinted sky, suggesting a water-scarce environment. The overall color palette is dominated by warm, earthy tones like orange, brown, and tan.

Status - "West Bengal"

A national level reflection workshop was held in India at the end of April 2013. Video update coming soon.

FLOW surveys were collected for a much smaller number of water points in 2011 than in 2012, and only included Water For People water points. In 2012, monitoring was completed throughout the blocks of Sagar and Pathar Pratima in West Bengal including Water For People and non-Water For People water points. Due to this, the score given for sustainability decreased significantly in 2012 but gives us a clearer view of reality in these blocks.

The results presented are a consolidation of the "Everyone, Forever" districts in which we work, not results for the entire country.
