## **Committee Goals**

1. To continually seeking and encouraging membership in the committee and section.
2. To focus is on cross connection control and backflow training, education, and technical support throughout the section.
3. Provide networking opportunities and a place for Cross Connection Specialist and Testers to turn when needing help and support with their cross connection programs and testing issues.
4. We are committed to continued support of other Agencies, Committees and Associations related to Cross Connection Control and Backflow Testing [Oregon ABPA, The Group (Western Washington), SRC4 (Eastern Washington), Oregon Health Authority, Washington Department of Health, & Idaho DEQ].
5. To have a Cross connection control tract at the PNWS conference every year.
6. To create a Back flow training in the box with the TCC.
7. To provide at least one CEU approved training/workshop per year. Focusing on current issues and hot topics with in the cross connection industry.

The committee is working diligently on the 2019 PNWS CCC conference tract. It is also our intention to put on a Small Public Water System CCC Program development class this fall, date TBD. We are actively reaching out and recruiting future committee officers to lead the committee in achieving our goal of educating people about the importance of cross connection control in water systems.

**Next Cross Connection Committee January 2019 (time & date TBD)**
