

Securing Regulatory Compliance

Managing and exploiting data effectively
to make informed decisions

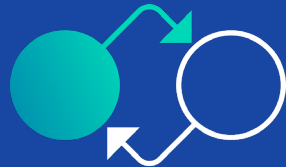

Compliance = Core Purpose

Protecting the environment and human health

Future of Regulations

Onus on polluter, not
just water authorities

Data is a challenge –
single source of the truth

Is the current approach to regulatory compliance management sustainable?

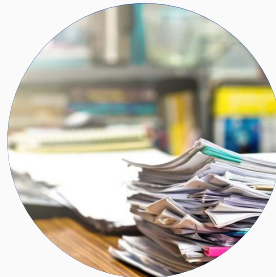

Labor

Largest operational cost

Data & Offline Practices

20-50% of time spent on manual admin

Need Single Source of Truth

Turn structured data into systemized processes

Meeting changing regulatory patterns

Manage Risk

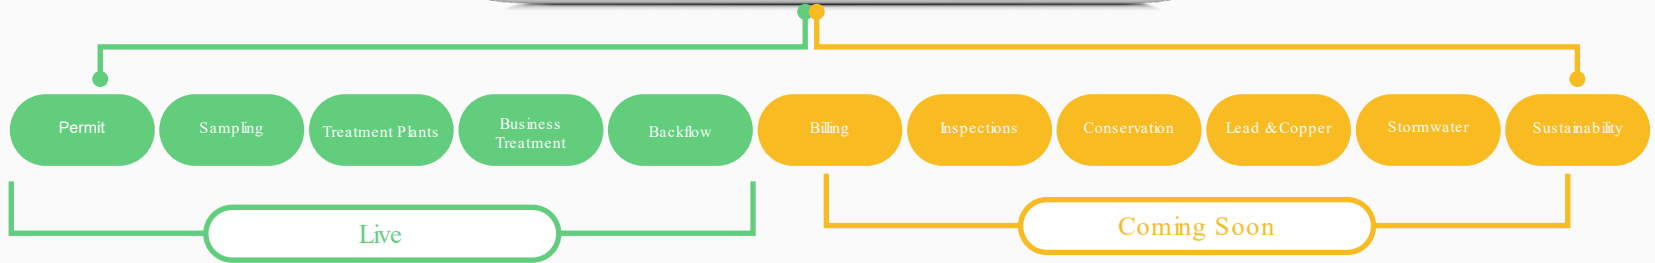

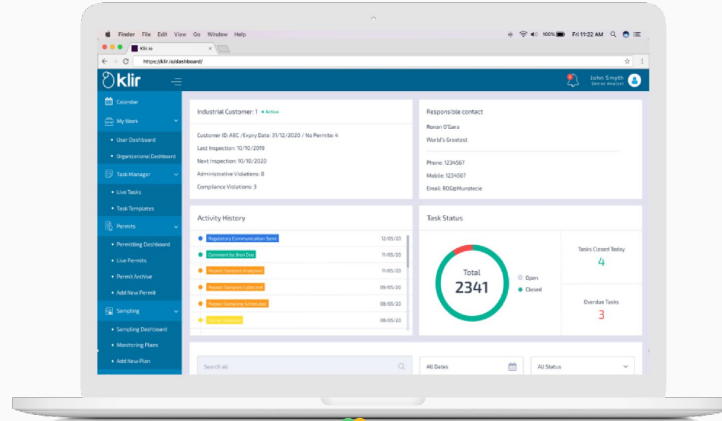

Reduce Admin Overhead

| | |
|-----------------------------------|-----------------------------------------------|
| Recently Enacted Water Laws | |
| Costs of Implementation - Anaheim | \$2,318,000 |
| Potential Penalties | \$1,000 - \$25,000 (per day or per violation) |

Source: [Anaheim Public Utilities](#)

Bringing regulatory compliance data together

...And reaping the benefits

Save time.

One system to find
all data.

**Reduce
Risk**

Single source of
truth.

**Improve
Cybersecurity**

Reduce security
gaps & IT spend

**Fluid
Collaboration**

Share updates as
they happen.

**Eliminate silos
for good.**

With centralized
systems.
